

Hazardous materials concept for offshore wind farms

When establishing, operating or deconstructing an offshore wind farm, materials representing potential hazards to humans or the marine environment are used.

In order to obtain a license an offshore wind farm operator is obligated to submit a concept for the handling of such substances.

As a competent partner ep4 offshore advises you in following areas:

- ›› **Representation of relevant sets of rules**
- ›› **Transport of dangerous goods**
- ›› **Storage of hazardous materials**
- ›› **Handling of dangerous substances**

Please consult us for helping you to establish individual strategies for your project!

Experience for many years makes the company ep4 offshore a reliable partner for your intents
