

Waste management and consumable concept for offshore windfarms

In notices of approval for offshore wind farms consumable and waste handling concepts are required.

In order to obtain a license the operator must submit such a concept. Beside the operation of the plant construction and deconstruction have to be taken in consideration.

Our concept represents relevant sets of rules and describes environment-friendly strategies for transport and storage of different materials.

- »» **Consumable**
 - »» **Waste materials**
 - »» **Dangerous substances**
 - »» **Sewage Treatment**
 - »» **Logistic procedures**
